### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 6-10 are rejected under 35 U.S.C. 102(e) as being anticipated by **Recknagel** [US 2002/0134607].

In claims 6, **Recknagel** discloses device in a vehicle for monitoring the environment around the vehicle, comprising:

an environment sensor system (1 and 2, fig. 1) having a predetermined detection range (7 m); and

an analyzer module (control unit 3) for analyzing a signal of the environment sensor system, wherein the analyzer module selects and tracks at least one object in the predetermined detection range as a function of at least one predetermined parameter (par. 12-14, 22-25).

In claims 7, **Recknagel** discloses the at least one predetermined parameter includes one of a relative speed between the vehicle and the at least one object, and a direction of the relative speed (par. 13).

In claims 8, **Recknagel** discloses the analyzer module is connected to at least one restraint unit associated with the vehicle, the analyzer module triggering the at least one restraint unit as a function of tracking of the at least one object (claim 1).

In claims 8-9, **Recknagel** discloses the at least one restraint unit is one of a reversible seatbelt tightening system 4 and an extensible bumper 6 (fig. 1, par. 13 and 22).

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anne V. Lai whose telephone number is 571-272-2974. The examiner can normally be reached on 9:00 am to 6:30 pm, Monday to Thursday.
